Message from the Guest Editors

This call for a Special Issue aims to present perspectives from all continents on what Global Learning for Sustainable Development can be today, and what it could mean for the future of our planet.

When the term was originally coined, the intention was to underline that cooperation and intelligent action is needed on a global scale, to resolve the serious environmental threats our modes of production have resulted in. Sustainable development is still interpreted as continuing on a path of unrestrained economic expansion. Education for sustainability in schools or universities is still very far from transforming societies or enabling transitions to sustainability. The question is therefore what can global learning mean, if our aim is not only to achieve incremental improvements, but to reverse current trends before we cross even more tipping points? How can we define truly sustainable development, while seriously considering both economic and technological implications? How can we as societies organize our learning for transitions to sustainability, within and outside existing formal education systems?

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded and Social Sciences Citation Index (Web of Science), as well as Scopus and other databases.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 15.3 days after submission; acceptance to publication is undertaken in 4.6 days (median values for papers published in this journal in the first half of 2019).
